

```
# grammar — one verb per request
VERB target [FLAG=value ...] [N0=...] [: payload]
```

VERBS — THE OPERATION

ANS	direct answer, nothing extra
EXPLAIN	answer + reasoning
DEFINE	define a term / concept
COMPARE	weigh options against each other
DECIDE	pick one and justify
DRAFT	produce new text
REVISE	rework text I give you
CRITIQUE	find flaws, no rewrite
PLAN	ordered steps to a goal
CODE	write code
SUMMARIZE	compress provided material
BRAINSTORM	many options, breadth

FLAGS — MODIFIERS

LEN=	1line · brief · para · full · Nw
FMT=	prose · bullets · table · code · json
DEPTH=	eli5 · normal · expert
TONE=	plain · blunt · formal

N0= — SUPPRESS (VERBOSITY KILLERS)

N0=preamble
N0=caveats
N0=hedging
N0=followup-questions

Highest value. Adopt these + **LEN=** first.

CONTROL WORDS

ASSUME:	fill gaps with these, don't ask
CTX:	background / data, kept separate
REF:	source material to rely on
IF .. ELSE	conditional branch
ASK	invite clarifying Qs (off by default)
SET ..	set a default for the session
RESET	clear session defaults

EXAMPLES

```
DECIDE postgres-vs-sqlite FMT=table
DEPTH=expert N0=preamble
  CTX: 1-user desktop app, <100MB, offline
```

```
DRAFT cover-letter LEN=brief TONE=plain
N0=hedging
  REF: <paste job posting>
  ASSUME: 5 yrs exp, no relocation
```

```
EXPLAIN tcp-handshake DEPTH=eli5 LEN=para
N0=caveats
```

```
SET LEN=brief N0=preamble N0=caveats
# inherited until RESET
```

SESSION-DEFAULT BLOCK

Paste into **custom instructions** / **user preferences** so the vocabulary is always active:

```
I sometimes prefix requests with a compact
syntax:
VERB target [FLAG=value] [N0=...] [: payload].
Treat VERB as the operation, FLAG=value as
output constraints, N0=x as things to omit,
CTX:/REF: as background vs source, ASSUME:
as gap-fillers so you don't ask. Honor these
literally. With no prefix, default to: brief,
no preamble, no hedging, answer first.
```

Borrowed: **EXPLAIN** & budget-thinking from **SPL** —
Structured Prompt Language prepended-decorator style from
Prompt Decorators. Version it: v0.1 → v0.2.
